

CDR Vehicle List - CDR Software v3.2

Important Information about Vehicle Coverage

BOSCH

Invented for life

The Bosch Crash Data Retrieval Software and Hardware products support the retrieval of crash data from Airbag Control Modules (ACM), Roll-over Sensors (ROS) and Powertrain Control Modules (PCM) installed in vehicles listed in this document as indicated by the markings in the column labeled "Module".

Many vehicles listed in this document include references to manufacturer specific notes which may indicate limitations in CDR product coverage. Make sure that you read the reference notes prior to determining if a vehicle is supported.

Bosch takes all reasonable actions to ensure the CDR System supports production vehicles (US and Canada) as listed in the CDR product documentation. However, due to (but not limited to) the availability of information at the time the product is developed, Bosch cannot guarantee 100% coverage of the supported vehicles listed in the documentation.

In the event that a vehicle coverage exception is found, Bosch Tech support will document the issue and Bosch will attempt to resolve it in a future release. If you are experiencing trouble retrieving event data from any of the vehicles listed in this help file please contact technical support for further assistance.

Supported Chrysler Vehicles

2004 - 2005

Make	Model	Module
Dodge	Durango (note 2, 4 & 6)	ACM

2006

Make	Model	Module
Chrysler	300 (note 3, 5 & 6)	ACM
Dodge	Charger (note 3, 5 & 6)	ACM
Dodge	Durango (note 2, 4 & 6)	ACM
Dodge	Magnum (note 3, 5 & 6)	ACM
Dodge	Ram Cab Chassis (note 4 & 6)	ACM
Dodge	Ram Pickup (2500, 3500, 4500, 5500) (note 4 & 6)	ACM
Dodge	Ram Pickup (1500) (note 4 & 6)	ACM
Jeep	Commander (note 3, 5 & 6)	ACM
Jeep	Grand Cherokee (note 3, 5 & 6)	ACM

2007

Make	Model	Module
Chrysler	300 (note 5 & 6)	ACM
Chrysler	Aspen (note 4 & 6)	ACM

2007

Make	Model	Module
Chrysler	Pacifica (note 5 & 6)	ACM
Chrysler	PT Cruiser (note 5, 6 & 8)	ACM
Chrysler	Sebring (note 4 & 6)	ACM
Dodge	Caliber (note 4 & 6)	ACM
Dodge	Charger (note 5 & 6)	ACM
Dodge	Dakota (note 5 & 6)	ACM
Dodge	Durango (note 2, 4 & 6)	ACM
Dodge	Magnum (note 5 & 6)	ACM
Dodge	Nitro (note 4 & 6)	ACM
Dodge	Ram Cab Chassis Medium/ Heavy Duty (note 4 & 6)	ACM
Dodge	Ram Pickup (2500, 3500, 4500, 5500) (note 4 & 6)	ACM
Dodge	Ram Pickup (1500) (note 4 & 6)	ACM
Jeep	Commander (note 5 & 6)	ACM
Jeep	Compass (note 4 & 6)	ACM
Jeep	Grand Cherokee (note 5 & 6)	ACM
Jeep	Patriot (note 4 & 6)	ACM
Jeep	Wrangler (note 4 & 6)	ACM

2008

Make	Model	Module
Chrysler	300 (note 5 & 6)	ACM
Chrysler	Aspen (note 6)	ACM
Chrysler	Pacifica (note 5 & 6)	ACM
Chrysler	PT Cruiser (note 5 & 6)	ACM
Chrysler	Sebring (note 6)	ACM
Chrysler	Town & Country (note 6 & 7)	ACM
Dodge	Avenger (note 6)	ACM

2009

Make	Model	Module
Dodge	Journey (note 6 & 7)	ACM
Dodge	Nitro (note 6)	ACM
Dodge	Ram Cab Chassis Medium/ Heavy Duty (note 4 & 6)	ACM
Dodge	Ram Pickup (2500, 3500, 4500, 5500) (note 6)	ACM
Dodge	Voyager	ACM
Jeep	Commander (note 6)	ACM
Jeep	Compass (note 6)	ACM
Jeep	Grand Cherokee (note 6)	ACM
Jeep	Liberty/Cherokee (note 6)	ACM
Jeep	Patriot (note 6)	ACM
Jeep	Wrangler (note 6)	ACM

Chrysler Vehicle Coverage Notes

The numbers below coincide with the note reference numbers called out in the supported Chrysler vehicles listed above.

1. For console mounted shifter, center tunnel before or aft of shifter. For column mounted shifter, center stack.
2. Only vehicles equipped with side airbags can be read out by the CDR tool.
3. For model year 2006, some Chrysler 300, Dodge Magnum, Dodge Charger, Dodge Dakota, Jeep Grand Cherokee, and Jeep Commander models may contain EDR data that can not be read by the CDR tool.
4. Crash data is recorded for FRONTAL DEPLOYMENTS ONLY on these vehicles.
5. When downloading these modules using the provided CDR cable, plug the cable into the CDR Interface Module, apply power and wait at least 1 minute after power is applied before collecting data. Failure to do so may cause an error during download.
6. When collecting data thru the DLC connector, these ACMs require the vehicle's ignition key to be switched on.
7. Retrieval of crash data thru the DLC is not supported on these vehicles. You will need to use the specified interface cable to connect directly to the ACM for retrieval of crash data.
8. For model year 2007, some PT Cruisers may contain EDR data that cannot be read by the CDR tool.

Supported Ford Vehicles

2001

Make	Model	Module
Ford	Crown Victoria	ACM

Ford Vehicle Coverage Notes

The numbers below coincide with the note reference numbers called out in the list of supported Ford vehicles listed above.

1. PCM Note: This vehicle is equipped with a Motorola PCM that can store 32K bytes of data which is 16 times more than other PCMs. Downloads for these PCMs can take up to 8 minutes to complete all 3 passes of the download.
2. PCM Note: This vehicle may be equipped with a Bosch or Motorola (Continental) PCM. The Bosch PCMs are currently not supported by the CDR tool. You may be able to verify the PCM's manufacturer by looking at its serial/part number label.

3. PCM Note: Heritage F150 series trucks are not equipped with PCMs that store crash data. Only 2004 F150 series with the following VIN information are supported:

First 3 digits of the VIN are "1FD" or "1FT" combined with one of the following 5-7 VIN digits: "F02", "F04", "F12", "F14", "W02", "W04", "W12", "W14", "X02", "X04", "X12", "X14"

4. ACM Note: When retrieving data through the DLC connector, use the F-00K-108-221 PCM Adapter with the F-00K-108-287 DLC cable to avoid possible spoliation of PCM data while the ignition key is on during the download. Refer to PCM/RCM data collection instructions in this help file before you begin collecting ACM data.
5. ACM Note: Downloading data from these ACMs can take up to 3 minutes per pass and 9 minutes for a complete download.
6. PCM Note: This vehicle's PCM may only store 12.5 seconds of crash data.
7. PCM Note: Only gasoline engine PCMs are supported for these vehicles. Diesel engines (8th digit of VIN = P) are not supported.

GM Vehicle Coverage Notes

The numbers below coincide with the note reference numbers called out in the list of supported GM vehicles listed above.

1. Connect directly to the SDM for EV1 electric cars.
2. Does not record pre-crash data.
3. 1999 Saturn vehicle's DLC port has a non-standard wiring configuration and does not interface with the Bosch OBD II interface cable (02002837). Please connect directly to the SDM, or contact Bosch for more information.
4. These trucks have different SDMs depending upon body style. If the eighth digit of the VIN is either F, J, or R, please use the 02002888 cable.
5. For DLC data collection, use the 12 pin DLC cable (P/N: 02003090).
6. Clicking on cable part number displays expected data.
7. No key is required to download these vehicles, leave ignition off.
8. Use the specified CDR cable if the first 3 digits of the VIN are 1GT, 2GT, 3GT, 1GD, 2GD, 3GD, 1GC, 2GC, 3GC, 1GB, 2GB, 3GB and the production sequence number (last 6 digits of the VIN) is 500000 or lower.
9. Use the specified cable if the first 3 digits of the VIN are 1GT, 2GT, 3GT, 1GD, 2GD, 3GD, 1GC, 2GC, 3GC, 1GB, 2GB, 3GB and the production sequence number (last 6 digits of the VIN) is 500001 or higher.
10. Use the specified cable if engine code is 9 or E (8th digit of VIN).
11. Use the specified cable if engine code is not 9 or E (8th digit of VIN).
12. Use the specified cable if engine code is 7 (8th digit of VIN).
13. Use the specified cable if engine code is not 7 (8th digit of VIN).
14. Use the specified cable if the 5th digit of VIN is a'V'.
15. Use the specified cable if 5th digit of VIN is an 'R'.

(GM coverage notes continued on next page)

GM Vehicle Coverage Notes (continued)

16. Only vehicles equipped WITH side curtain airbags have a ROS module. You can tell if a vehicle is equipped with side curtain airbags visually either by noting if they were deployed in a crash or the 'B' pillars are marked with the word "Airbag". Note that the CDR application will allow you to attempt to retrieve ROS data from vehicles without side curtain airbags even though the ROS module is not installed. In this case, the CDR application will display a communication error when attempting to retrieve ROS data.
17. Crash data retrieval with the ignition key OFF may not be supported on this vehicle. If you are unable to collect data with the key off, try again with the key ON.

Supported Isuzu Vehicles**1998 - 2000**

Make	Model	Module
Isuzu	Hombre	ACM

2003 - 2009

Isuzu	Ascender	ACM
-------	----------	-----
